

Complement and HAE: Beyond simple swelling!

Featured speakers:

Dr Paul Keith, MD MSc FRCP

Allergist/Immunologist
Associate Professor, McMaster University

Dr Mel Berger, MD, PhD

Senior Medical Director, Immunology R&D at CSL Behring
Adjunct Professor of Pediatrics and Pathology
Case Western Reserve University
Cleveland, Ohio, USA

Moderator:

Stephen D Betschel, HBSc, MD, FRCPC, FAAAAI

Associate Professor of Medicine
Department of Internal Medicine, University of Toronto
Division of Clinical Immunology and Allergy
St. Michael's Hospital

Objectives:

- Describe the roles of complement and complement receptors in the disposal of antigens and dead cells.
- Recognize that the effects of C1 inhibitor deficiency on the contact-kallikrein-bradykinin system are distinct from its effects on complement's system and its role in immune homeostasis.
- Understand how to use results of COMPACT study to plan a therapeutic regimen for HAE patients.
- Identify those HAE patients for whom continuous maintenance of a therapeutic
